

Amendments to the Claims: This listing of claims will replace all prior versions, and listings, of claims in the application

Listing of Claims:

1. (Currently Amended) A digital broadcasting receiving apparatus, having a receiving circuit for receiving a transmitted high frequency signal of a plurality of time division multiplexed programs, comprising an operation starting point controlling circuit that varies a operation starting point of a variable gain circuit ~~a circuit for selecting-establishing~~ a better receiving characteristic condition while a desired program is not received.

2. (Original) The digital broadcasting receiving apparatus according to Claim 1, wherein the circuit for selecting a better receiving characteristic condition is a parameter switch timing generating circuit.

3. (Original) The digital broadcasting receiving apparatus according to Claim 2, wherein the parameter switch timing generating circuit is arranged to switch over antenna characteristics.

4. (Original) The digital broadcasting receiving apparatus according to Claim 3, wherein the antenna characteristic comprises two different polarized wave surface antennas, which are arranged to be switched each other.
